

# TRANSPORTATION MANUFACTURING SERVICES

Around the world  
Under the earth  
Above & beyond

› Transportation products manufacturers today operate in an increasingly complex regulatory environment throughout the entire life cycle of their plant operations. Golder Associates Ltd. has considerable experience in this industry, assisting clients at each stage of a factory's lifetime from initial setup through to shutdown. We provide a wide range of engineering services including environmental, health and safety management, construction and decommissioning services, and waste management that we package as an integrated solution tailored to the unique needs of each client.

## CLIENT FOCUSED

Golder has a wealth of experience working with clients in the transportation products manufacturing industry. Our professionals develop close working relationships with their clients to gain a deep understanding of the complex environments in which they operate. This is important in assisting clients to achieve their financial, social and environmental goals.

The establishment of solid client relationships is supported through long-term organizational stability and a unique culture at Golder. Employee-owned since our formation in 1960, we all have a pride in ownership.

## SOLID SERVICE

Since Golder offers a broad range of services with multi-disciplinary teams, we are able to simultaneously consider multiple aspects of a site or issue. This complete package allows a more thorough understanding of a project and an integrated solution.

Project team members can be drawn from Golder's pool of international expertise as well as local professionals who are familiar with the issues and particulars of the area, due to our broad office network in North America and internationally.

With more than 5000 staff worldwide, including 40 offices across Canada and 43 offices across the USA, Golder is well positioned to meet the environmental and geotechnical engineering requirements of the automobile and other transportation products manufacturers around the world.

## OUR CORE VALUES:

- Reliable, innovative, cost-effective solutions
- Professional, cultural, gender and business diversity
- Supportive of personal growth, learning and risk taking
- Responsible participation in business and ownership
- Sustainability of financial return to staff and owners
- Integrity in our relationships, commitments and quality services
